

## AZOMITE® Application rates

**1. Vegetable & Flower Gardens:** Apply 1/2 lb per 100 ft<sup>2</sup> or 1/2 lb. per 200 ft. of linear row in a 6" wide band.

**2. Trees, Fruit trees, Grape Vines, Ornamentals and Shrubs, etc.:** Add 1/2 lb. to 1 lb. to the soil around each plant and lightly till or water/irrigate into the soil.

**3. Lawns:** Apply 2-3 lbs. per 1,000 ft<sup>2</sup> once a year in the spring, fall or winter. This equals 20-30 lbs. /10,000 ft<sup>2</sup>.

**4. House Plants and Flowers:** Mix 1/2 teaspoon per inch of pot diameter with potting soil before planting. Apply ½ to 1 teaspoon every three months to the soil surface of the soil and water in.

**5. Greenhouse and Potting Soil:** Add 7 -10 lbs. per cubic yard of potting soil, and add to the irrigation water when possible, on a weekly basis, at a low rate.

**6. Compost:** Add 5-10 lbs. per 200 lb. of compost added at the beginning of the compost cycle.

**7. Hydroponics:** Add AZOMITE® to the irrigation water assuring there is adequate agitation, screen and nozzle sizes, and foliar sprays, and potting soil, as per above rates.

**Note:** This product is not water soluble and requires agitation when used in irrigation, spray applications, etc.
